Project Management Specialist — ISC Data Governance

PROFESSIONAL SUMMARY

PMP-certified Project Manager with 10+ years leading cross-functional projects from initiation through close across aerospace, insurance, higher-education, and government-funded environments, including direct experience within Integrated Supply Chain (ISC) functions — procurement, planning, and quality. Proven track record building KPI/executive dashboards, data aggregation and reporting structures, and process governance standards that improve data quality, compliance, and decision-making. Skilled at developing and implementing project controls, documentation standards, and reporting frameworks, and at facilitating cross-functional stakeholder alignment, training, and communication. Background includes federal grants compliance and insurance regulatory compliance, with current graduate study in Data Science, Policy, Governance & Society at Brown University — building deeper data governance and analytics expertise to complement a project management foundation.

CORE COMPETENCIES

Data Governance & Compliance: Data Governance Frameworks, Policy & Standards Development, Data Quality, Regulatory Compliance, Document Control, Data Privacy Awareness

Project & Program Management: Project Lifecycle Management (Initiation–Close), RAID Logs, Milestone & Schedule Management, Risk Management, Change Management

ISC / Procurement: Integrated Supply Chain, Procurement Strategy, Supplier & Vendor Coordination, Sourcing Support, Planning & Quality Coordination

Stakeholder Engagement: Cross-Functional Team Leadership, Training & Facilitation, Executive Reporting, Communication

Tools & Analytics: SQL, Tableau, Qlik Sense, Excel (Advanced), Jira, Microsoft Project, ClickUp, Monday.com, Confluence, SharePoint

Methodologies: Agile, Scrum, Waterfall, Process Improvement

Certifications: Project Management Professional (PMP) · Certified ScrumMaster (CSM)

PROFESSIONAL EXPERIENCE

Airbus Americas — General Procurement Project Manager

2025 – Present

- Own delivery of cross-functional procurement projects from initiation through close within the Integrated Supply Chain (ISC) organization, maintaining governance documentation, project plans, and status reporting that keep leadership aligned on scope, schedule, and risk.
- Serve as primary point of contact across procurement, engineering, supplier management, quality, and operations, facilitating recurring stakeholder meetings and driving timely issue resolution and data stewardship.
- Build and maintain executive KPI dashboards in Tableau, Qlik Sense, and Excel, translating complex operational and compliance data into actionable recommendations for senior leadership.
- Lead process-improvement and governance initiatives, identifying data and operational gaps and implementing documentation and reporting standards that support organizational compliance and growth.
- Apply AI-assisted tools to standardize status reporting, meeting documentation, and stakeholder communications, improving consistency and turnaround.

PDS Tech Commercial (Assigned to Airbus) — Project Manager, PMO

2023 – 2025

- Managed 10+ concurrent cross-functional projects within ISC (procurement, planning, quality), developing Tableau KPI dashboards that improved visibility into project status, financials, and operational metrics by 40%.
- Implemented project governance controls — RAID/risk tracking, burndown charts, Gantt schedules, and Kanban boards — maintaining adherence to timelines, deliverables, and reporting standards; improved project efficiency 25%.
- Leveraged advanced data aggregation and analysis techniques to produce 15+ reports and forecasts, including purchase-order and backlog analysis, supporting executive decision-making and a 30% improvement in project outcomes.
- Core member of a multi-functional team that built a \$30M procurement/subcontracting strategy; conducted bottom-up data analysis and presented Tableau-based findings that secured budget approval from senior leadership.
- Established a monthly reporting cadence and change-management process supporting supply-chain operations and cross-team accountability.

The Labz — Senior Technical Project Manager**2021 – 2023**

- Led Agile/Scrum delivery for software projects, facilitating sprint planning, backlog refinement, and stakeholder communications.
- Built Tableau resource-management dashboards that reduced design overhead 15% and improved stakeholder transparency 30%.
- Provided training and support on Scrum processes and PM tooling across cross-functional development teams, strengthening team compliance with delivery standards.

University of South Alabama — Grants Administration Specialist**2019 – 2021**

- Administered federal grant funds exceeding \$5M, maintaining 100% compliance with funding requirements, financial regulations, and internal/external policies — direct experience applying governance standards to protect data and financial integrity.
- Created 20+ reports and dashboards using Excel, improving stakeholder communication and financial/data transparency.
- Partnered with the School of Medicine and faculty on research, RFPs, and program implementation, and provided training and guidance to faculty and researchers on grant policies, procedures, and compliance requirements.

Traveler's Indemnity Company — Claims Analyst**2018**

- Managed full-cycle insurance claims while maintaining 100% compliance with internal/external quality standards and state-specific regulations, reviewing coverage, policy provisions, and documentation for accuracy.
- Resolved claims 25% faster through a disciplined data and file inventory system, achieving a 95% resolution rate.
